AGROPETROL is aimed at creating a marketplace venue for large, medium, and small agricultural companies to raise their efficiency in buying key energy commodities by direct meeting with manufacturers and traders of gasoline, diesel fuel, LPG, natural gas, electricity, and fertilizers. To gear up and support prospective deals and make them run smoothly, the event will host representatives from banks and financial companies and legal companies to offer their services to participants.

The proven success of AGROPETROL 2018 enabled us to broaden the scope of participants by inviting other sector representatives, in search of reliable energy suppliers, to join up. With rapid pace of introduction of new model for electricity market in 2019, the event will help participants to adjust its impacts.

AGROPETROL striving to become a networking place for energy suppliers and prospective industrial consumers.

**We are looking forward to meeting
you on 8 February 2019 in Kyiv!**
